PROTECT YOUR INVESTMENT

Protect your EV charging infrastructure with Transtector's surge protection solutions. With the rise of electric vehicle (EV) charging stations, the risk of damage from lightning strikes and power surges is greater than ever.

Transtector provides a full range of surge protection devices designed to keep your EV charging systems safe, from main service panels and power cabinets to charging dispensers and communication components.

Our surge protective devices meet the specific requirements of Level 2 charging products and Level 3 DC fast chargers, helping you ensure reliability, minimize downtime, and keep your charging stations running smoothly.
