SURGE PROTECTORS FOR SECURITY SYSTEMS

While your building security, IP surveillance and fire alarm systems guard your facilities 24/7, what is protecting those devices? They may be vulnerable to lightning strikes and other power surge culprits, but Transtector has the solutions for keeping them safe. We make rugged, dependable surge protectors for all facets of security systems – IP surveillance, access control, LED lighting, fire alarms, AC main panels, analog video and rackmount devices.

DPR-F140

1104-15-000

UPS COMBO KIT

SURGE PROTECTORS FOR IP SURVEILLANCE

These industrial SPDs guard IP-connected cameras on indoor and outdoor GbE/PoE++ data lines from lightning surge and other transient voltage using SASD and GDT technologies. We also have options for buying kits that conveniently include an SPD and all its required cables.

1101-607-1

SURGE PROTECTORS FOR ANALOG VIDEO

Protect your analog video equipment from lightning surge and other power transients with our data surge protector. Its SASD technology protects equipment in CCTV PTZ protocol data networks while remaining transparent to data throughput. The indoor, industrial SPD has BNC

1101-372-1

DRDC

SURGE PROTECTORS FOR ACCESS CONTROL

Safeguard access control to your facilities with DIN-rail-mounted indoor DC surge protectors. They offer a 10-amp current rating and service voltage options from 7 to 70 Vdc. We also have data surge protectors for sense loops and RS-232 and RS-422 networks, with voltage ratings from 12 to 280 Vdc.

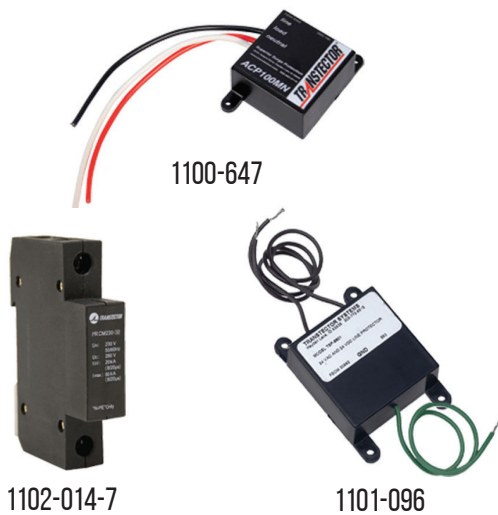

1102-014-7

1104-15-000

SURGE PROTECTORS FOR LED LIGHTING

Keep your LED lighting up and running despite power surges. Our industrial AC surge protectors absorb high amounts of transient energy while maintaining a low clamping voltage. They feature SASD and MOV protection and replaceable suppression modules.

SURGE PROTECTORS FOR FIRE ALARMS

None of your systems is more critical than your fire alarms. Protect it from power surges with our data SPD for CATV repeaters/amplifiers protocol data networks. We also offer AC SPDs with high-capacity MOV protection for equipment that operates on a 230 Vac single-phase electrical service.

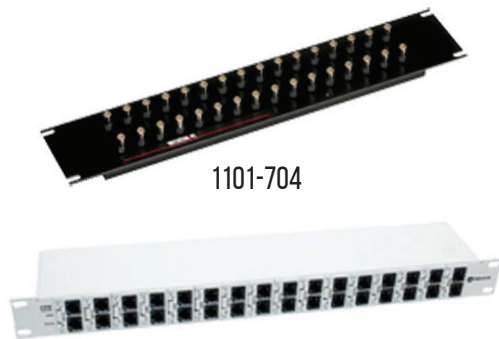

APEX IMAX 120T

12R-T240-4P277

SURGE PROTECTORS FOR AC MAIN PANELS

AC main panels control power for many security systems, so surge protection here is crucial. Our industrial, indoor/outdoor, AC SPD guards equipment that operates on a 277 Vac, 3-phase Wye electrical service. Or consider our HEMP-tested SPD for AC panels on a 120/240-Vac split-phase service.

1101-985

SURGE PROTECTORS FOR RACKMOUNT DEVICES

Transtector offers several rackmount devices to provide surge protection for security equipment. Our 16-port data SPD uses SASD circuits to protect CCTV devices from surge. Another multi-port data SPD we offer is loaded with 16 GbE protection modules for configurable, mixed-signal protection using GDT.

WHY TRANSTECTOR

Transtector provides high-quality RF, AC, DC, EMP, and data signal surge protection solutions and enclosures for mission-critical networks worldwide. Whether you require custom or standard products, our goal is to continually exceed your expectations with reliable components, dedicated customer service, and focused technical support.

About Infinite Electronics

Infinite Electronics is a leading global supplier of electronic components serving the urgent needs of engineers through a family of highly recognized and trusted brands. Our portfolio of brands, including Pasternack, Fairview Microwave, L-com, MilesTek, ShowMe Cables, NavePoint, INC Installs, Integra Optics, PolyPhaser, Transtector, KP Performance Antennas, RadioWaves, and Aiconics are technology specialists that provide broad inventories offering engineering-grade products, expert technical support, and same-day shipping.
